

Handheld flares

Red

These handheld flares are designed to give maximum output from a minimum size container.

The red IKAROS handheld flare is for short-range distress signaling on ships, lifeboats and life rafts. It is also the best pinpoint signal for pleasure craft.

The flares have been developed from the IKAROS parachute flare, which is known to be the best in the world. The case is made of corrosion-resistant steel and carries clear and simple instructions for use. IKAROS handheld flares have been approved globally and meet the latest SOLAS regulations.

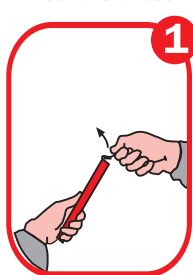

- Maximum output, minimum size
- Corrosion resistant steel case
- Excellent light intensity
- Globally approved

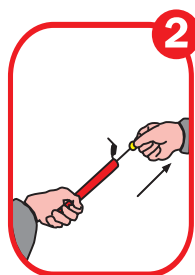

Handheld Flares

	Red
Light intensity	15,000 cd
Burning duration	> 60 s
Smoke time	-
Dimensions	243 x 30 mm
Weight	235 g
Ref. no.	34 15 00
USCG no	160.121/EC0575/MEDB00005F3
SOLAS MED B	MEDB00005F3

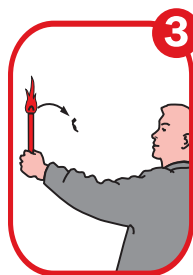

Directions of use:

1. Hold the plastic handle with one hand. Open the top lid

2. Pull the ignition cord away from you. Hold at arms length. Point downwind and away from people.

3. Hold the flare by the narrow part of the plastic handle during the burning time. Once the flare is burnt out, cool it down in water, if possible. CAUTION, tube is HOT. Do not look directly into flame.
